PROFESSIONAL SUMMARY

- My skills are made up of various knowledge acquired during my studies and professional experience.
- The programming languages of java, javascript, html, css as well as agile methodologies complemented with devops using continuous integration with azure were acquired in projects related to the banking sector.
- I have financial knowledge in definitions such as passive, active, workflow, portfolio, credit, fixed term which have been acquired while making software for the banking area.
- Understanding of requirements from the stage of refinement, development and feedback has been important to generate and deliver a quality product to the customer.
- In the 4 years of experience I have handled java as a programming language for the backend being spring boot the most used.
- I know frameworks like angular for web pages using bootstrap to styles.
- I have made mobile applications using react-native or jquery being typescript the base programming language.
- As a primary skill I have advanced knowledge in git performing pull request, push, merges and conflict resolution between branches or repositories.

WORK EXPERIENCE

SOFTWARE DEVELOPER

Nov 2022 - Aug 2023

FORMOS • Quito, Ecuador

- Achieved the development with special attention to details.
- Refactored and cleaned up code, crucial for enhancing performance and reducing application time.
- Created and delivered training materials including manuals and videos.
- Designed a mobile application using React Native and SQLite for a new customer.
- Formulated logic using linear programming to optimize problem-solving in mobile applications.
- Implemented regex patterns and printer services from external sources in both the mobile application and web page.
- Proposed improvements for the website and expanded new functionalities.

LEADER DEVELOPER

Jan 2021 - Oct 2022

COBISCORP • Quito, Ecuador

- Analyzed, designed, and installed software, elevating performance within the banking process.
- Ensured continuous integration with DevOps practices.
- Refined backlogs utilizing the Scrum methodology.
- Provided support in certification and production environments.
- Developed various modules, boosting potential client numbers through calculated logic for maximum offered amounts.
- Gathered data and information on user experiences, training effectiveness, and challenges to enhance user productivity.

DEVELOPER

Apr 2019 - Dec 2020

COBISCORP • Quito, Ecuador

- Utilized various technologies including connectors and orchestrators to streamline service request response times.
- Undertook front-end, middleware, and backend development tasks.
- Constructed an internal banking and core banking platform to enhance connectivity with potential clients within the country.
- Managed Tomcat container releases, ensuring warranty services post-installation.

EDUCATION

College diploma in Software Engineering

CCTB • Vancouver

Sep 2023 – Present

College diploma in Big Data and Machine Learning

Pontifical university of Chile • Quito, Ecuador

Nov 2021 - Sep 2022

Engineer in Mechatronic Engineering

Armed Forces University- ESPE • Latacunga, Ecuador

Sep 2013 - Jul 2019

SKILLS

Microsoft Office, Agile methodologies, SCRUM, Java, Javascript, Matlab, Jenkins, Git, Azure, Docker, React-Native, Angular, SpringBoot, MySQL, PostgreSQL, Workbench

CERTIFICATES

SCRUM Foundations Professional Certificate

AWS Academy Cloud Foundations
